MULTI-POINT LOCKS – *2 & 3 POINT*

No. 5611-82X*R&L

This 3-point latch is designed for lightweight metal or wood doors. With its simplified all-steel construction, it is easily attached by means of screws, bolts, rivets or welding. The center case has detents for positive open and close positioning.

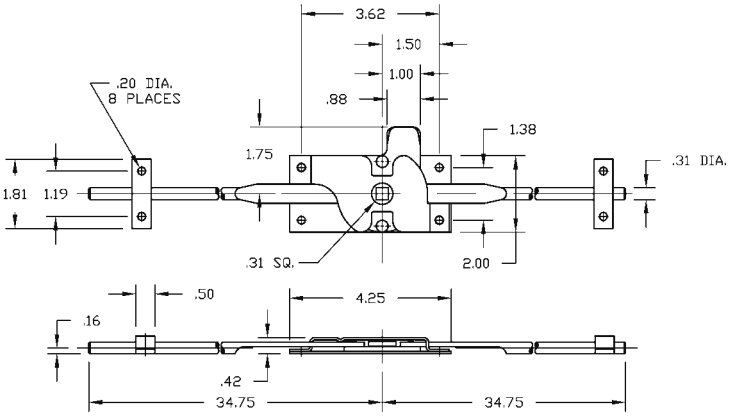
The rods are easily attached or removed without tools; with the rod in a horizontal position, simply place the hole in the flat end of the rod over the pins in the center case, swing the rod to a vertical position and attach the rod guides.

Available in right- or left-hand. Specify when ordering.

For use with a variety of handles having a 5/16" shank.

Finish: Zinc-plated
Weight: 2 lbs. each

No. 5611-R



*82X Indicates 4 sets per box.

No. 1-5646-54

Rod guide assembly for 5/16" diameter rod with spring to reduce rattle. Zinc finish.

Slam-Action Strike	–		561	(8)

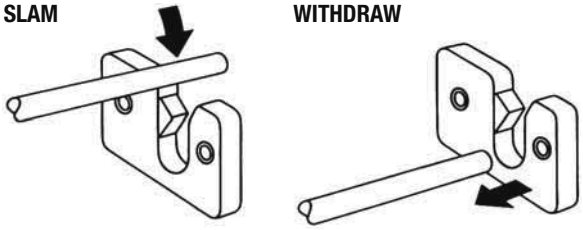
No. 560-82X
This unique, light-duty 2-point squeeze dead bolt latch is intended for use on lightweight compartment or cabinet doors. It incorporates a zinc center case, 5/16" aluminum rods, and stamped steel guide brackets and strike points.

The latch is readily activated with a simple two-finger squeeze. This retracts the end bolts from the strikes (whether the ones shown, or a slam-type strike, such as that illustrated).

The center case is easily attached by means of a steel mounting bracket using two self-tapping screws.

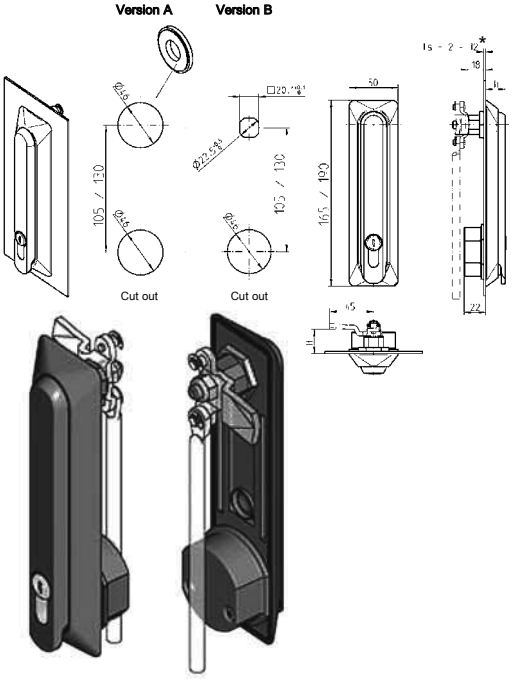
Weight: 3.25 lbs.

Can be used with adjoining key-locking cylinder **No. 560-61P5.**



No. 561 Slam-Action Strike
This strike allows any latching mechanism using 5/16" diameter rods which normally operate as dead bolts to function as a slam/dead bolt.

Swinghandle – *PROGRAM 1107*



Attention:
With adapter the maximum door gauge (TS) will be 6 mm

MULTI-POINT LOCKS – *2 & 3 POINT*

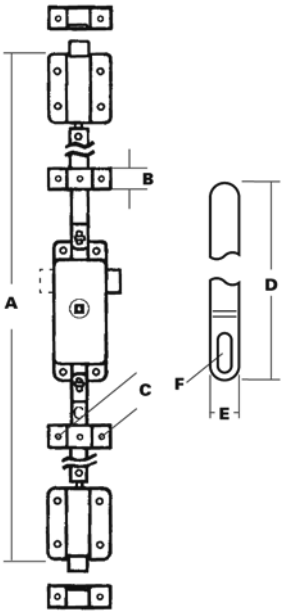
A new left-handed version has recently been developed to suit European and U.S. requirements where fittings are normally on the left-side rear doors.

ORDERING CODE

3/18341	3-way slam system, left-hand
3/18342	3-way slam system, right-hand
3/18343	2-way slam system, right-hand
3/18344	2-way slam system, left-hand

Normally supplied in boxed sets of 10 units.
All components are provided, including guides (3/18617), strikers (3/12341), rivets (19-7) and wave washers (58-21).

SPECIFICATION



Right-hand unit illustrated, left hand is identical but for position of central slam-bolt.

Standard linkage bar 3/12497 used on 3-way slam system.

A. Max. Length of system..... 2057mm
B. Guide plate width..... 25mm
C. Guide hole centres..... 40mm
D. Length of linkage bar..... 915mm
E. Linkage bar section ..... 12 x 3mm
..... Cranked 5mm (rolled edges)
F. 'Free movement' slot..... 22mm

All other dimensions shown on individual component pages.
Centre bolt withdraws by 11mm maximum.

Complete right hand assembly 3/18342 (includes all items shown).

Latch is shown as mounted on inside of panel.

2/3-WAY SLAM SYSTEMS

These versatile systems are assembled on site from standard end-latches, together with centre case (opposite) and connecting bars. The three slam bolts act together and are withdrawn simultaneously.

Left and right-hand versions are identical apart from position of centre bolt and direction of rotation of centre follow-bush. 2-way versions do not have centre slam-bolt.

System slams shut, is opened by inside/outside handle or T-key. It can be slammed even when handle is locked, due to 'free movement' allowed by link bars.

Rotation of centre follow-bush withdraws slam bolt fully into case, also withdraws links at each end, which operates slam latches. System is handed by position of centre-bolt and direction of operation of follow-bush.

Components are fully plant-on, with 'quick fit' attachment of link bars to centre case. Plain end should be cut and drilled as required: rivets and washers are supplied with kit.

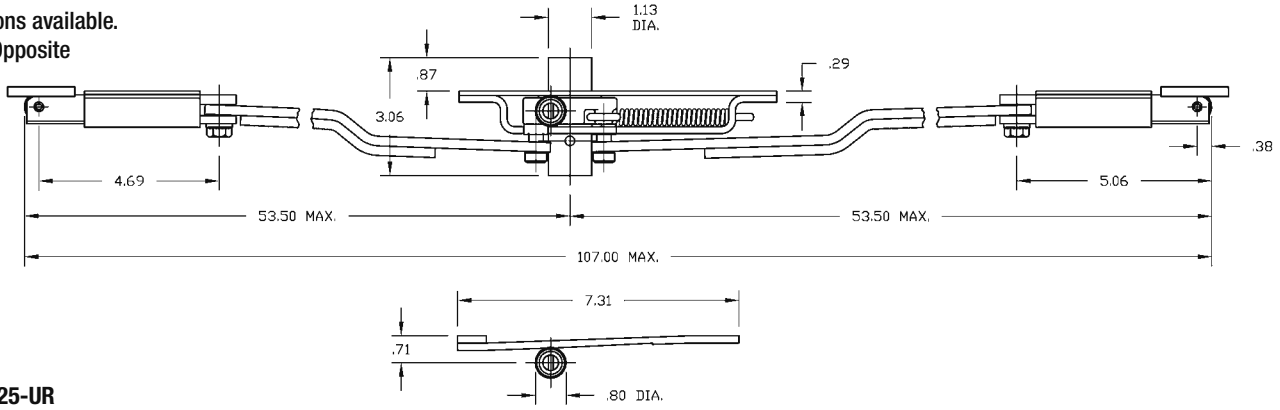
Zinc-plated throughout.

- Centre bolt omitted for 3/18343.
- Bolt can be reversed or extended to special request.
- Alternative end latches.
- Special link bars to order.

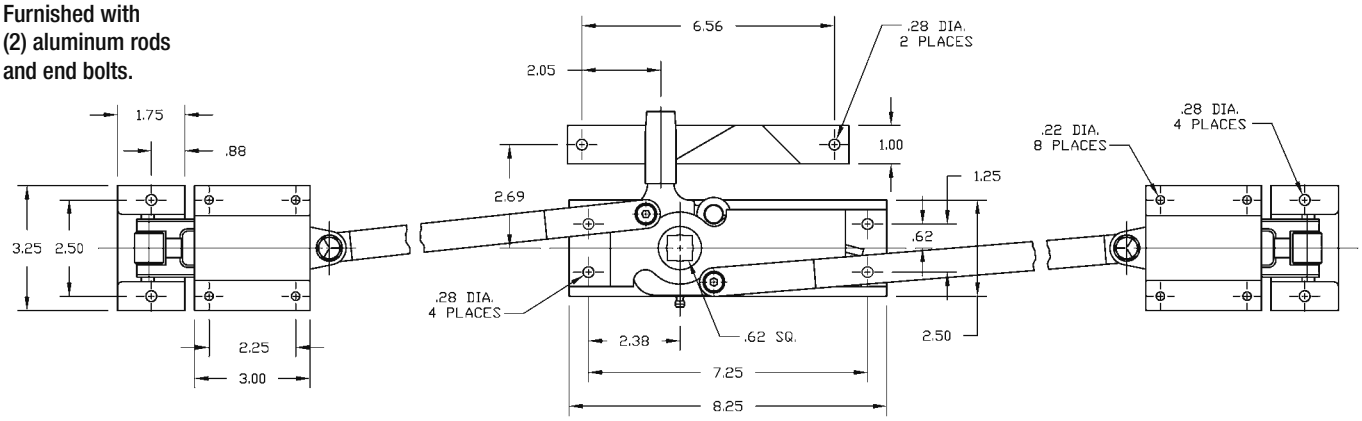
MULTI-POINT LOCKS – *2 & 3 POINT*

No. 4-2525-UR
Furnished standard with (2) 48" long double reinforced welded rods.

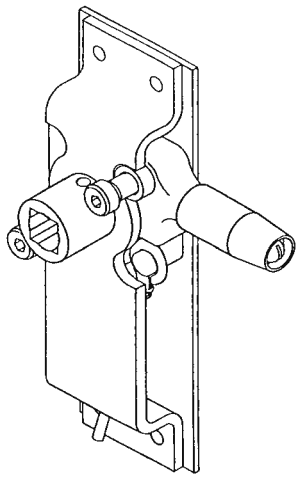
Other versions available.
Left-Hand Opposite



No. AL5-2525-UR
Furnished with (2) aluminum rods and end bolts.



No. 4-2525-50R&L



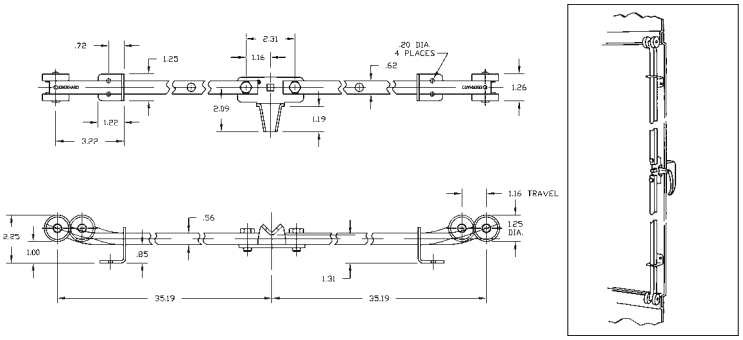
Optional Center Cases for Series 2525 Roller Latch. Other combinations available.

No. 4-2525-50R&L is the most commonly used center latch. The inside handle is attached easily by centering over hub and attaching two bolts. The stainless steel roller extends outward 2-5/16".
The latch has (4) .28" dia. mounting holes, is spring-loaded and designed to be used with an inside release.

Finish: .0003 cadmium with yellow chromate per QQP416 Type II, Class II.
Weight: 3.35 lbs.

MULTI-POINT LOCKS – *2 & 3 POINT*

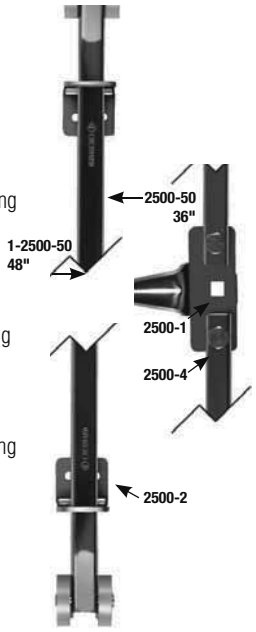
No. 2500-U



No. 2500

- Lightweight 16-gauge steel channel is as strong as rod, but offers significant cost savings.
- Riveted, long-wearing nylon rollers are extra-large diameter (1-1/4") to provide firm, snug closure.
- Easily installed on any metal cabinet (including NEMA) 72" or shorter.
- Will accept any handle with 5/16" square shank, threaded or not. Handles are available.
- Comes complete with two L-brackets for bolting or welding and center cam latch.
- 36" rod is standard on **No. 2500**. When 48" rod is desired, specify **No. 1-2500-U**.

Finish: Zinc-plated with yellow chromate



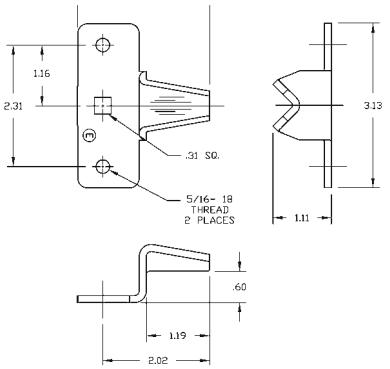
No. 2500-1
A sturdy latch activated by any handle with 5/16" square shank. Two additional rods, channels or cable may be attached for multipoint latching.

Finish: Zinc-plated with yellow chromate
Weight: .21 lbs.

No. 9-2500-1
Offset Striker

Similar to No. 2500-1 except cam is .36" longer.

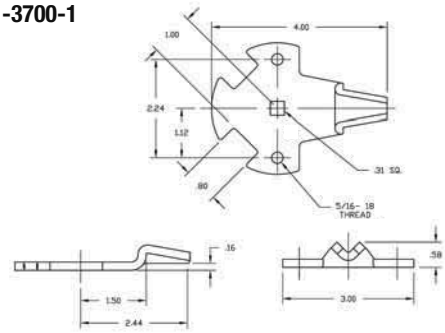
No. 2500-1



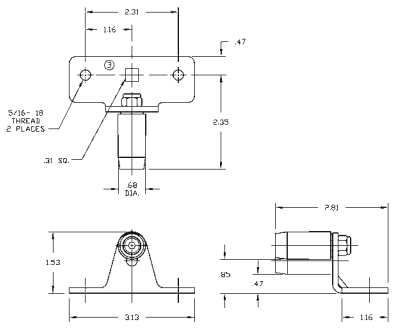
No. CL1-3700-1
Universal center latch similar to 2-2500-1. No need to order right or left.

Finish: Zinc-plated with yellow chromate
Weight: .31 lbs.

No. CL1-3700-1



No. 3-2500-51



No. 3-2500-51
Roller Pawl Center Latch

A unique variation on the No. 2500-1 center latch. The nylon roller allows smoother, more noise-free action. In addition, the roller can be adjusted for precise fit.

Finish: Zinc-plated with yellow chromate
Weight: .22 lbs.

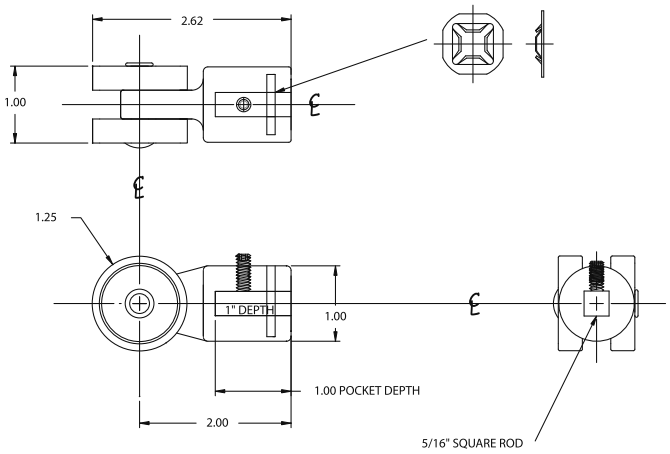
MULTI-POINT LOCKS – *2 & 3 POINT*

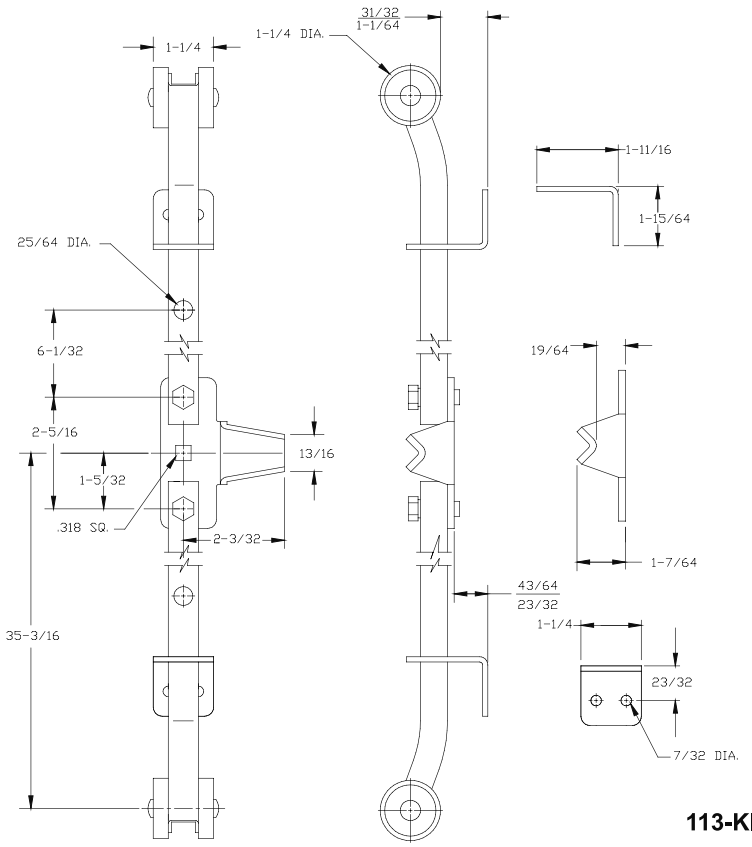
No. 16722-50PK



Patent Pending

No. 16722-50PK

Cast end fitting with nylon rollers designed for 5/16" round or square rod applications, the nylon roller offers ease of actuation of any dead bolt latch. Mounting is achieved by inserting the retaining clip through the side of the casting and inserting the rod. The rod can be further retained by tightening the set screw on the side of the cast body. The design allows the user to use straight rod cut to length and add the end fitting as required. Zinc finish.



113-KIT

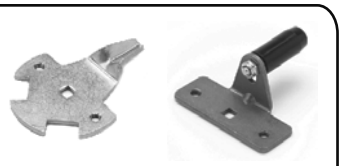
113 DOOR LOCK KIT

- Steel construction/zinc finish
- (2) 35” roller rods
- (1) 113 center cam
- (2) “L” brackets
- (2) 113 shoulder screws
- Accepts 5/16” square shank
- ✓ **Available in aluminum**
- ✓ **Specify no. 113-6 for heavy cam**
- ✓ **Available with roller cam**
- ✓ **Specify no. 113-48 for 48” rods**
- ✓ **Available with stainless steel rods**

optional cams are available with an adjustable bushing.

This eliminates the need for a threaded shaft, thus reducing cost.

OPTIONAL CAMS



113-6 *113-R*

MULTI-POINT LOCKS – *2 & 3 POINT*

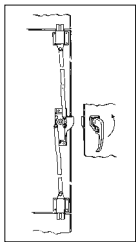
No. 5624-U
For large, heavy door applications which need to stand up under strenuous service use.

Three-point locking. Liberal slide bolt travel assures a positive grip. Can be used on right- or left-hand installations.

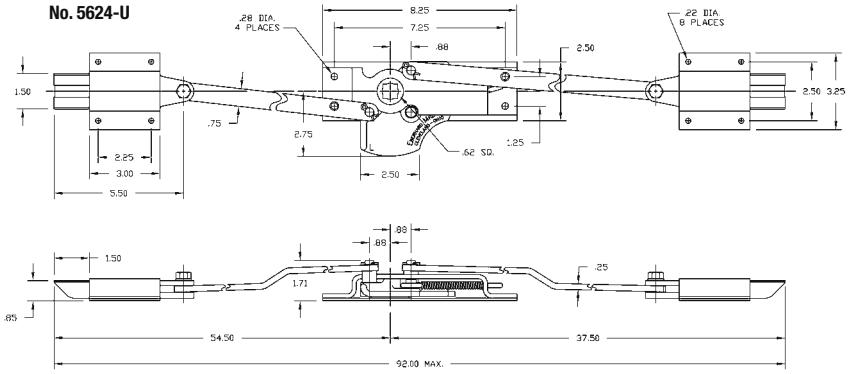
Recommended outside handle is **No. 5624-52** Padlock type with 5/8" square shank. Handles must be ordered separately.

Finish: Zinc-plated

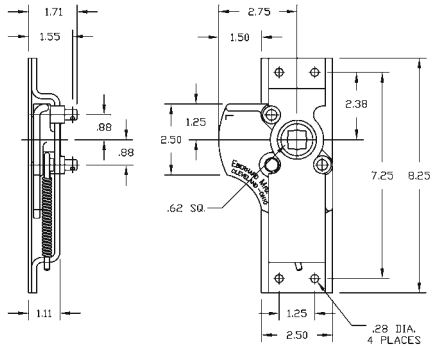
No. 5624-U



No. 5624-U



No. 5624-50U



No.	Options	Variations	Weight
5624-U	3-Point		10.63 lbs.
5624-50U	Single-Point	Center case only	3.25 lbs.
81-5624-U	3-Point	48" rods	x.xx lbs.
5631-14		48" upper rod	x.xx lbs.
5631-15		32" lower rod	x.xx lbs.

All parts shipped including end bolts.

No. 5624-P24
Same as 5624-U except less rods.

No. 15924
Keeper

No.	Options	Variations	Weight
A23-5624-50U	Single-Point	Aluminum center case with long reach cam	1.69 lbs.
A25-5624-50U*	Same as above	Less spring	1.54 lbs.

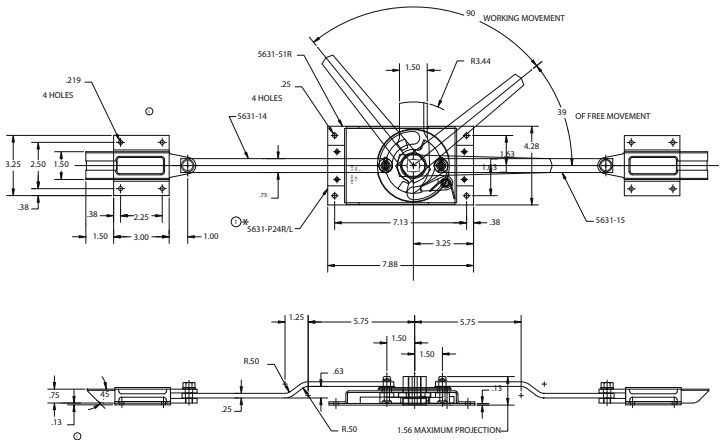
***82X and 82XX indicate packed four sets to a box.**

No. 5631-UR&L
With rods.



No. 5631-P24R&L
Same a 5631-UR/L less rods.

No. 5631-51R&L
Center case.

No. 5631-UR&L Heavy-Duty 3-Point Door Lock.
Fastens doors at top, bottom and center. Lock cannot work open because a trigger automatically secures rods in closed position and only a deliberate turn of handle from base releases them. Slide bolts extra heavy with a travel of 1-1/2" to furnish a good grip in body sills.

Cases made of heavy gauge steel. Rods are flat steel and lie close to surface of door. Can be used on doors up to 3" thick and 7-1/2' high. Also easily fitted to thinner and shorter doors. Available in right- or left-hand. Indicate hand required when ordering.

Recommended outside handles are **No. 5624-52** Padlock type. Handles ordered separately.

Dimensions:	
7-7/8"	length of center case
4-9/32"	width of center case
3"	length slide bolt cases
3-1/4"	width slide bolt cases
1-1/2"	width of slide bolt cases
3/4"	thickness of slide bolts
48"	length upper rod
31"	length lower rod

11.25 lbs. weight each
Finish: Cadmium .0003 per QQP416 Type II Class II.

MULTI-POINT LOCKS – *2 & 3 POINT*
